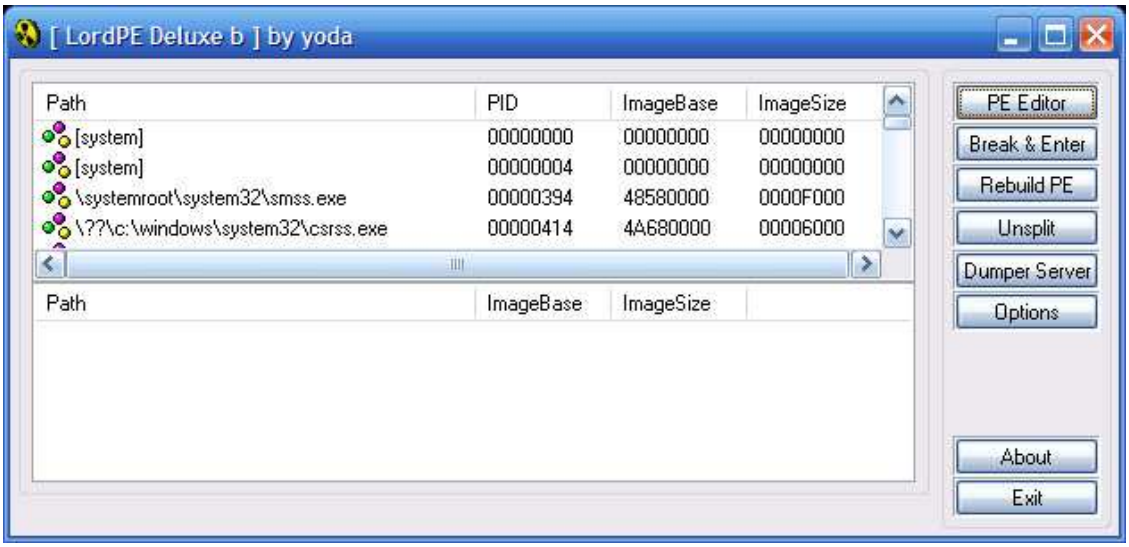
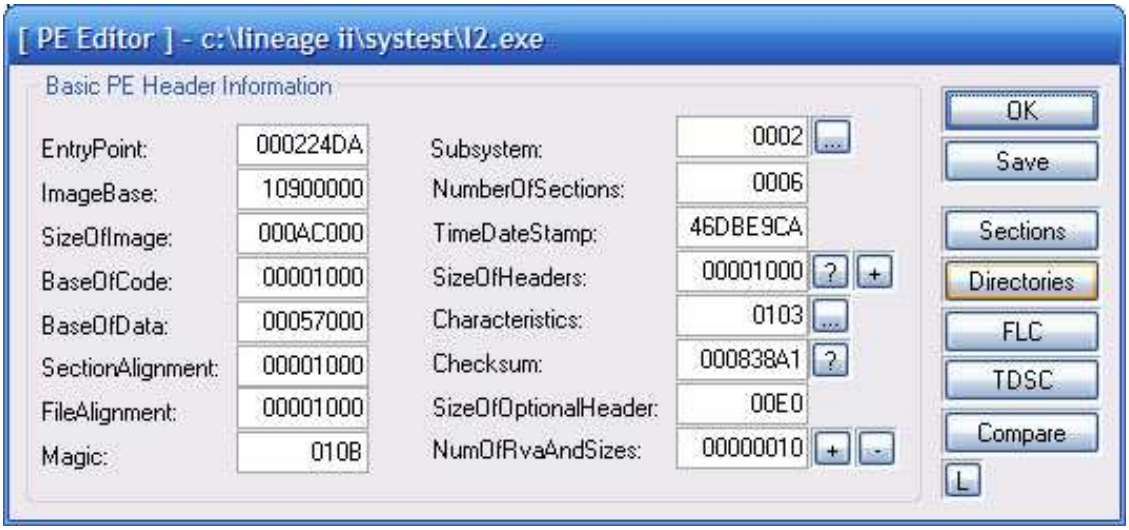
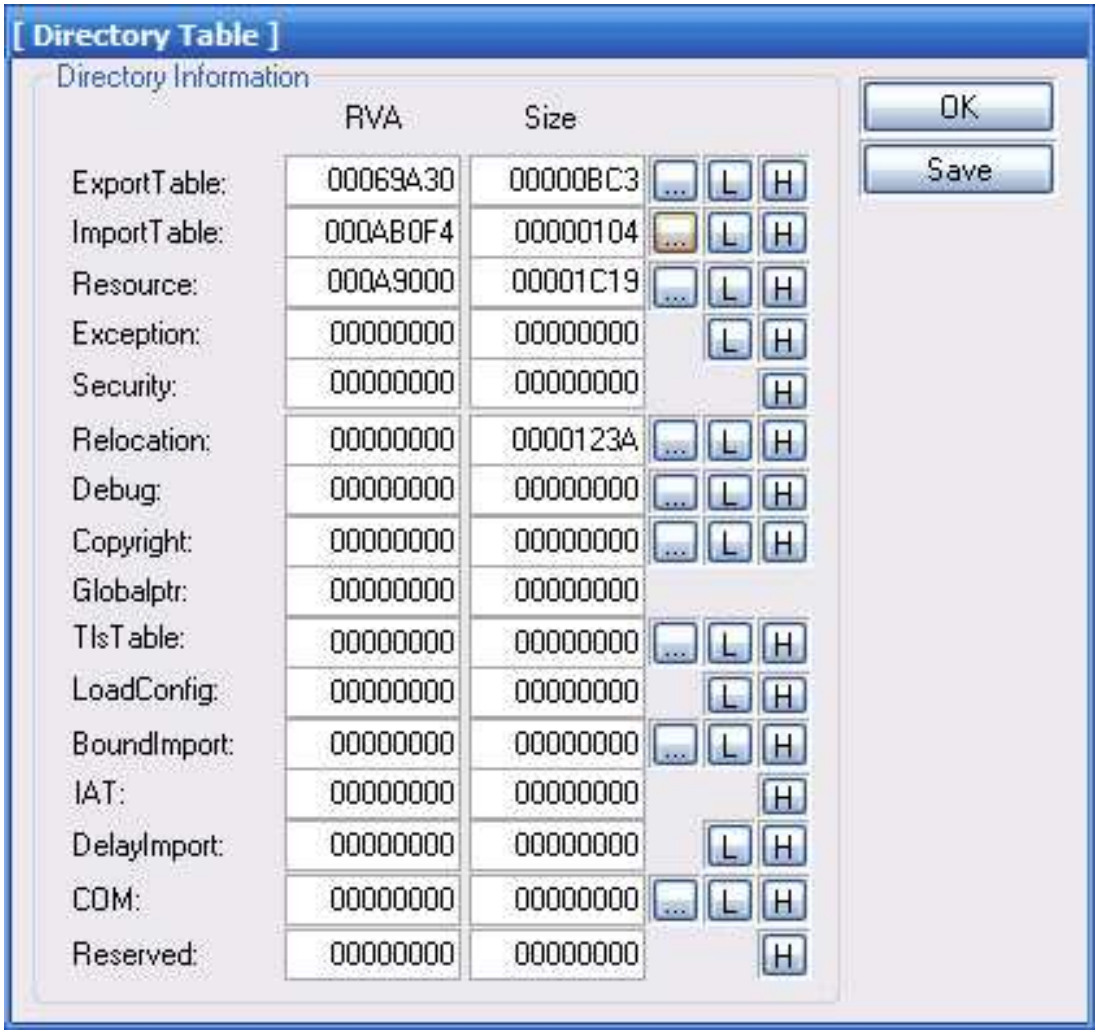
Adding an import with LordPE.

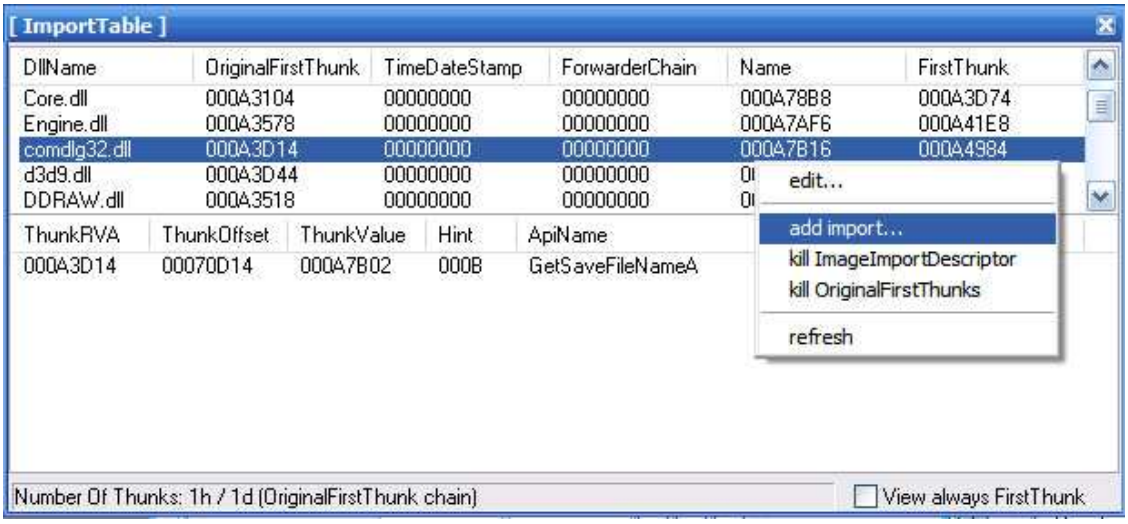


Open L2.exe with LordPE, and click the button labeled “Directories”



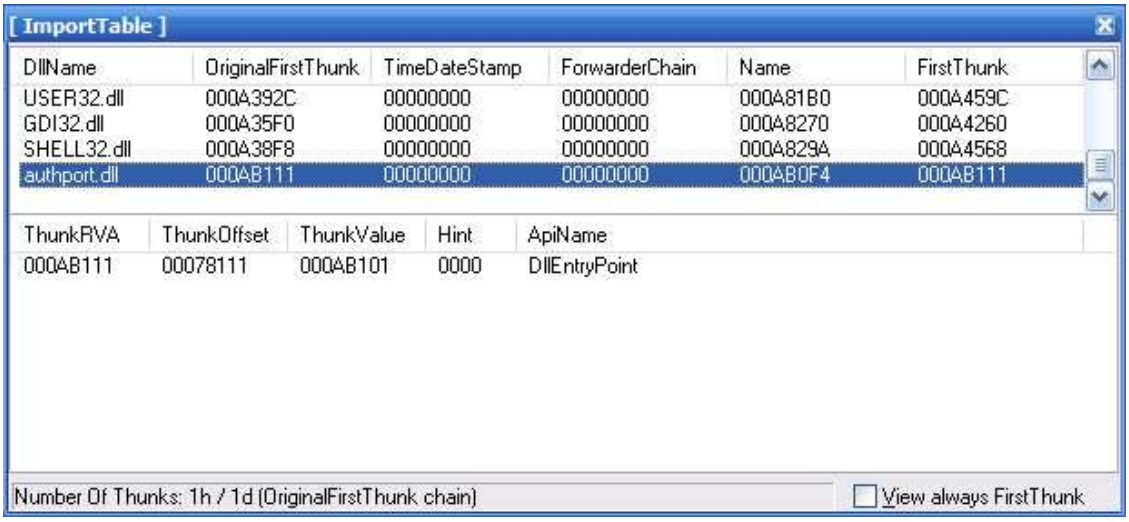


In the window labeled “Directory Table” click the button labeled “…” beside value Size for the Import Table column.



Right click the window and select “add import…”

For Dll enter: authport.dll
API: DllEntryPoint
Uncheck the box labeled “Check imports for existence” then click the + button, then click “Ok”



[ImportTable]

DllName	OriginalFirstThunk	TimeDateStamp	ForwarderChain	Name	FirstThunk
USER32.dll	000A392C	00000000	00000000	000A81B0	000A459C
GDI32.dll	000A35F0	00000000	00000000	000A8270	000A4260
SHELL32.dll	000A38F8	00000000	00000000	000A829A	000A4568
authport.dll	000AB111	00000000	00000000	000AB0F4	000AB111

ThunkRVA	ThunkOffset	ThunkValue	Hint	ApiName
000AB111	00078111	000AB101	0000	DllEntryPoint

Number Of Thunks: 1h / 1d (OriginalFirstThunk chain)

View always FirstThunk

If you follow these directions, you will see authport.dll with the API DllEntryPoint now in the Import table.

That’s all =)
